

You're invited to a **very different** movie experience

You'll be blindfolded, you won't watch the movie, but instead listen to the movie through the method of audio description.

What is audio description?

Audio description is a vital accessibility feature for Australians who are blind and vision-impaired. It is the verbal narration of a movie that describes what is happening on screen, including physical actions, facial expressions, costumes, settings, and scene changes, between the lines of dialogue.

All movie goers will be provided with an eye mask to wear.

Book Club
