

Ian Constable Lecture 2025

Global health challenges: How and why innovative MedTech solutions will make a difference

Professor Ian Meredith AM

In the Lions Eye Institute's 25th annual Ian Constable Lecture, please join Professor Ian Meredith AM as he explores the topic of how global health challenges such as a growing and ageing population provide both challenges and opportunities for MedTech innovation.

We face several critical global health challenges in this century unlike any that have beleaguered the human civilisation over the past 20,000 years.

It is, therefore, timely to revisit John F Kennedy's question of whether adding life to one's years rather than years to one's life should be our mission?

Thankfully, in a time of unprecedented technological and computational advances, unparalleled opportunities for MedTech, digital health and biotech innovation abound – including opportunities that we, in Australia, could consistently lead the global effort.

About Professor Ian Meredith AM

Professor Ian Meredith AM is currently a Vice Chancellor's Professorial Fellow at Monash University and a Non-Executive Director serving on the boards of both national and international MedTech companies.

In 2012 Ian received an Order of Australia (AM) in the General Division for outstanding service to medicine in the field of cardiology as a clinician and researcher and for advisory roles with a range of public health and organisations.

WHEN

7.00pm – 8.30pm
Wednesday,
26 February 2025

LOCATION

University Club of
Western Australia,
UWA, Crawley

PARKING

On campus via
Entrance 1, or
along Hackett
Drive

ACCESSIBILITY

This event is
wheelchair
accessible

SECURE YOUR FREE TICKETS VIA EVENTBRITE
